

bëerGUARD

The beerGUARD is expertly designed to safeguard beer bottles and cans during transit to eliminate damages.

beerGUARD Benefits

Eliminates breakages – The top and base layer snugly encase the product within the shipping outer to reduce movement and prevent rattling to eradicate damages during shipping.

Multi-purpose – The universal single fitment is used for both the top and base and can be applied across multiple pack types, including 330ml & 500ml bottles and cans, reducing packaging componentry and costs within your business.

Space saving – The fitments nest together for condensed storage.

Complete transit offering – Tailored shipping cases are available to meet your specific product requirements.

Made in the UK – Short lead times & low MOQ's.

Made from moulded pulp – Recyclable, biodegradable & compostable.

330ml Bottles
Each bottle sits snug inside the universal cavity.

500ml Bottles
Bottle caps are protected by the moulded cavity end.

Cans
Reduce rattling and movement for products in transit.
