

# Moulded Pulp Produce Trays

**Eco-Friendly**

## — Moulded Pulp Produce Trays

Extend product shelf life by up to three days with our eco-friendly produce trays.

Manufactured in the UK to the highest quality standards, we offer a wide range of trays to safely store and transport a variety of produce types.

# — About our Moulded Pulp

## Manufactured in the UK

A leader in the moulded pulp industry, Cullen is Europe's only combined manufacturer of moulded pulp & corrugated packaging. Our manufacturing takes place at our ISO accredited 610,000 sq.ft. site near Glasgow, where our team of experts have been designing and manufacturing effective produce packaging solutions for decades.

## Eco-Friendly

Producing over 400 million pieces of moulded pulp per year, we are proud to support growers & retailers with eco-friendly packaging solutions. By manufacturing products with the lowest environmental impact, we support companies to meet their own sustainability goals in addition to reducing the level of non-recyclable waste sent to landfill.

## Certified

Cullen's produce range is certified by the BRCGS for "Packaging Materials" up to the 'high risk' category for use as food-grade packaging. In addition, the EU certification EN 13432 confirms each product is certified with industrial compostability.

## Trusted by our customers

Thanks to our robust product engineering and manufacturing capabilities, our produce packaging is now used by many growers and retailers across the UK & Europe including Asda, Tesco, Aldi & Lidl. Its reliability has enabled our customers to store, ship and display produce with confidence whilst reducing abrasions and spoiling associated with alternative packaging materials.

eco-  
friendly

# Moulded Pulp Packaging Benefits

Moisture absorbent  
to reduce food waste

Made in the UK  
from recycled paper

Strong packaging to  
protect delicate produce

minimise storage

# — Over 45 unique produce trays

We have over 45 unique produce trays, all of which are designed to safely carry your product.

# — New Products

At Cullen, we're continuously adding to our produce tray portfolio to offer new moulded pulp packaging solutions for fruit and vegetables. Designed to protect produce in transit, the trays absorb moisture and extend produce shelf life by up to three days.

 **biodegradable**

## Trio Avocado Tray

Moulded to the contours of the fruit, our new trio avocado tray will keep your avocados well protected in transit.

 **eco-friendly**

## Mango Tray

Our black kraft duo mango tray is designed to perfectly house the fruit from grower to store, to protect the fruit from damage and abrasions.

 **compostable**

## Plum Tray

Designed to safeguard the delicate plum in transit, our new 4 plum tray isolates each fruit in its individual cavity, preventing bruising and spoiling.

# — Room for more

Our trays are versatile and can be used for multiple types of fruit and vegetables
